

## Exercise 4

Write a program that asks the user to type 9 integers and writes the smallest value.

```
int number [9], min;
for (int i=0; i<9;i++)
{
cout << "Enter a number:";
cin >> number [i];
}
min=number [0];
for (int i=0; i<9;i++)
if (number[i],min) min=number [i];
cout << "The smallest of all these
numbers is "<< min;
```
